Scrum master (Sprint 1):

Huzaifa Sabah Uddin (hs540@student.le.ac.uk) arranged meet ups and also kept a balanced check with the development team.

Jan 16, 2024

We Met as a team and discussed about the basics and layout for the project and discussing further on possible frameworks to use.

We marked attendance in a google sheets so that its easier to track.

Jan 23, 2024

We met again after a week or so to starting finalizing the user stories and some code ethics while working on the project.

Jan 30, 2024

We met again after a week when we completed **login and register** to discuss about the functionality of the login and registration and how to go forward. We finalized to work on dashboard and css for the login and register.

Feb 6, 2024

We met after a week again after completing majority of the user stories login and register, dashboard, courses, start time. We discussed on improvement about css and how to implement end time and we came to a conclusion to implement a quiz to record end time.

Feb 13, 2024

We met after a week again to start testing and debugging. We encountered an issue on start time and had to rewrite the whole codebase(majority controllers and models were changed). This ensured the issue was resolved for both start and end time.

We started to work on review and improvements for the written code. We finished everything including 4 mandatory user stories and 2 extra.

Feb 19, 2024

Demo Recording

Completed:

- 1. Login and register**
- 2. Dashboard view**
- 3. Start time recording**
- 4. End/completion recording**
- 5. Filtering through courses**
- 6. Leaderboard (Top 5)**
